

Wherever there is technology, there needs to be cybersecurity. Make this a collaborative effort by completing this bingo card with your parent(s) or another trusted adult. Together, we can build a more secure digital world!

CYBERSECURITY BINGO

<p>Start using a password manager</p>		<p>Hold a family “tech talk” to discuss how each family member can protect their devices, accounts, and personal information</p>	<p>Investigate what you should do if you are impacted by a data breach</p>	<p>Enable multifactor authentication (MFA) on your accounts</p>
<p>Look up cybersecurity tips for using social media safely</p>	<p>Turn on the auto-lock feature & set a passcode on your devices</p>	<p>Research how to create strong passwords and update any reused passwords</p>	<p>Review the privacy settings on your devices</p>	
<p>Set your social media accounts to private</p>	<p>Talk with your parent(s) or legal guardian about whom you are and are not allowed to communicate with online</p>		<p>Read about cybersecurity in the news</p>	<p>Find out what phone apps you have installed that track your location</p>
	<p>Restart your devices to ensure security updates have been fully installed</p>	<p>Back up important information</p>	<p>Learn why public Wi-Fi is not secure and why VPNs are helpful</p>	<p>Discuss with your parent(s) or legal guardian what they are and are not comfortable with you sharing online</p>
<p>Watch a YouTube video about phishing</p>	<p>Tell a friend about this bingo card</p>	<p>Research what you should do if you think you have been phished</p>		<p>Turn on automatic software updates on all devices</p>
