

Emergency Management and Recovery

Preparedness

Response

Recovery

Mitigation

Tidal Basin Caribe provides housing and infrastructure recovery support in Puerto Rico and across the Caribbean. We have hands-on expertise with federal funding authorities, a history of client advocacy and retention, and dedication to enabling a full and efficient financial recovery. We employ local experts in all aspects related to grant and program management.

We know Puerto Rico

Tidal Basin Caribe was created as an additional entity to Tidal Basin Government Consulting to provide specialized recovery services in Puerto Rico and the Caribbean. We have supported Puerto Rico Electric Power Authority (PREPA) with project formulation, cost estimation, and grant management support to seek reimbursement from FEMA for damages to facilities across the Island.

Following Hurricane Maria, we were “boots on the ground” in Puerto Rico within 48 hours. Hiring, training and managing 1,100 people, Tidal Basin successfully managed the largest Shelter and Temporary Essential Power (STEP) program in United States history, providing services to

more than 100,000 Puerto Rican residents with zero Inspector General (IG) audit findings.

Tidal Basin Caribe provides services such as FEMA Public Assistance (PA), Hazard Mitigation Grant Programs (HMGP), HUD Community Development Block Grant–Disaster Recovery (CDBG-DR), U.S. Department of Treasury, Joint Field Office (JFO) stand-up, debris monitoring and management, damage assessments and overall program management.

Our team has provided professional grant management, disaster recovery, and auditing/appeals advisory support consulting services to more than 150 clients, totaling over \$40 billion in recovery funding and reimbursements at the federal, state, and local levels and for numerous private and non-profit organizations.

Tidal Basin Caribe's technical expertise includes all services associated with emergency and disaster management. Our team has been assisting Commonwealth agencies and Municipios, including – such as PREPA, PRDOH and ENLACE – since 2018. We advise clients how to take advantage of program eligibility to optimize financial recovery following disasters. Tidal Basin Caribe's technical expertise includes not only grants management and financial compliance, but also comprehensive project formulation and environmental compliance.

Select Project Experience

Puerto Rico Electric Power Authority (PREPA)

- FEMA 428 process
- Grants management
- 404 Hazard Mitigation Grant Program (HMGP)
- Infrastructure restoration

Puerto Rico Department of Housing (PRDOH)

- Project management staff
- Policy development; site and housing inspections
- CFR Compliance

Mennonite Hospital

- HMGP application and implementation
- Infrastructure restoration
