

Grant Management Recovery Services

Preparedness

Response

Recovery

Mitigation

Tidal Basin combines our capabilities with yours to deliver results-driven programs and expertise, protecting and returning assets to public, nonprofit, and private sector clients. Our best-in-class tools and talent unite all funding sources in every facet of the emergency management cycle: preparedness, response, recovery, and mitigation.

Tidal Basin's expertise includes:

- Public Assistance Program and Policy Guide (PAPPG)
- FEMA compliance reviews, guidelines, and overlaps with Housing and Urban Development (HUD) and Federal Highway Administration (FHWA) funding program requirements
- Sandy Recovery Improvement Act of 2013 (SRIA), including Alternate Procedures Pilot Programs and Dispute Resolution PA Program and Policy Guide FP 104-009-2
- Stafford Act, 44 CFR, and 2 CFR Part 200 "Super Circular"
- FEMA Public Assistance (PA), Hazard Mitigation Grant Program (HMGP), and other Hazard Mitigation Assistance (HMA) funding
- Department of the Treasury, American Rescue Plan Act (ARPA); Coronavirus Aid, Relief, and Economic Security (CARES) Act funding
- Department of Commerce/Economic Development Agency, USDA, Department of Transportation, and FHWA and FTA Emergency Relief Grants
- HUD Community Development Block Grant Disaster Recovery (CDBG-DR), CDBG-Mitigation (CDBG-MIT) and CDBG-CARES Act (CDBG-CV) funding

Your financial recovery is our goal

Tidal Basin's grant compliance and financial control/management expertise and virtual grant management and processing capabilities help ensure that your recovery stays on track from initial procurement to final audit.

Working closely with you, we determine the full extent of damages and pinpoint eligibility under various funding programs. We implement an effective project formulation and cost accounting strategy designed to optimize available funding, track the development of project worksheets and any related change orders, and pay close attention to the accurate quantification and full documentation of damages. Our methodology and foresight prepare clients from the outset for a successful final audit.

Our cost-saving approach

Tidal Basin's unique centralized support center model allows us to be exceptionally fast and flexible. Our innovative PA delivery gives our team access to specialized expertise while developing streamlined project applications and deliverables with the highest quality assurance.

\$40B

**in federal, state,
and local recovery
funding**

Tidal Basin represents and advocates for state and local governments, transportation, housing, critical infrastructure, healthcare, education, and others. We have proven capabilities supporting and managing complex recovery activities involving a comprehensive array of federal, state, and private funding sources.

Who we've helped

Puerto Rico Electric Power Authority (PREPA)

As Tidal Basin Caribe, we are providing services to support PREPA's recovery from Hurricanes Irma and Maria. Our subject matter experts are providing technical assistance and guidance on every aspect of FEMA's Public Assistance program, including grants management, project formulation, and policy strategy, as well as the 404 HMGP. To date, Tidal Basin has helped secure obligations totalling \$1.8 billion in PA funds, with additional funding pending.

Hurricane Maria, Puerto Rico STEP Program

Tidal Basin implemented FEMA's Sheltering and Temporary Essential Power (STEP) Pilot Program for the Commonwealth of Puerto Rico after Hurricanes Irma and Maria. It is the largest and most complex application in FEMA history, with an obligation of \$1.7 billion.

State of Alaska

Since 2011, Tidal Basin has provided the State of Alaska with technical assistance, staffing and program management support, state-run individual assistance efforts, disaster closeout assistance, and State Hazard Mitigation Plan update efforts.

Superstorm Sandy, Port Authority of New York & New Jersey (PANYNJ)

Tidal Basin provided PA, hazard mitigation, FTA, and insurance recovery support to PANYNJ in managing their estimated loss of more than \$2 billion following Hurricane Sandy. We also supported the Port Authority in their FEMA recovery following the 9-11 Terrorist Attacks and their insurance recovery following the 1993 World Trade Center Bombing.

Hurricane Iselle, Volcanic Eruptions and Earthquakes, State of Hawaii

Since 2014, Tidal Basin has provided FEMA PA and hazard mitigation staffing and program/grant management services, technical assistance, and project closeout support to the Hawaii Emergency Management Agency. With Tidal Basin's help, \$33.3 million in FEMA PA funds have been obligated to date, with additional funding pending.

Hurricane Irma, City of Key West, Florida

Tidal Basin is supporting Key West with recovery efforts from damage caused by Hurricane Irma, including managing FEMA eligible cost recovery related to debris removal, emergency protective measures, and permanent repair efforts that resulted in \$43.5 million in recovery costs.

The State of Alaska [has] a significant investment in the disaster recovery process for both state and federally declared events. The collaboration with Tidal Basin in these efforts has been so successful and seamless that in most instances applicants and FEMA staff don't even realize we have contractors on board unless we tell them.

Sam Walton
Program Manager for Disaster Assistance, State of Alaska
